AI Website Build Checklist Digihandler Academy

Plan, prompt, publish and connect a one-page business website with an AI builder like Lovable. No coding needed.

Step 1: Your one-page brief (fill this in first)

Business name and city _____

What you sell (one line) _____

Who it is for _____

The ONE action a visitor should take _____

Phone / WhatsApp number to show _____

Address and opening hours _____

3 reasons to choose you (true facts only) _____

_____

Brand colours and mood _____

Real photos you have (count) _____

A website layout you like (link) _____

Step 2: Sections for a small business landing page

- [ ] Top section (hero): one clear headline, one sentence, one button
- [ ] What you offer: 3 to 6 short cards
- [ ] Why choose us: real facts, no made up numbers or reviews
- [ ] Timings, address and a map link
- [ ] FAQs: 4 to 6 questions customers really ask you
- [ ] Contact: call button, WhatsApp button, simple form
- [ ] Footer: business name, address, privacy note

Step 3: First prompt template (copy and fill the blanks)

Build a one-page website for **[business]** in **[city]**. It is for **[audience]**. The main goal is to get visitors to **[one action]**. Sections: hero with a **[button text]** button, **[offers]**, why choose us, timings and address, FAQs, contact. Style: **[colours]**, clean and friendly, mobile first. Use simple English. Do not invent reviews, prices or numbers; leave placeholders I can fill.

Step 4: Build and edit checklist

- [ ] Add your brief to Project instructions so the AI remembers it
- [ ] Use Plan mode for big changes; read the plan before you approve it
- [ ] One change per prompt; name the place and what must not change
- [ ] Fix small text directly in the preview (visual edits)
- [ ] Attach a screenshot when something looks wrong
- [ ] Bookmark the version after each change that works
- [ ] If "Try to fix" fails twice, ask for the root cause in Plan mode
- [ ] Replace every placeholder with your real details and photos
- [ ] Check the page at phone size and desktop size
- [ ] Click every button: call, WhatsApp, form, map
- [ ] Send a test form entry and confirm you can see it
- [ ] Ask for a page title and description that name your business and city

Step 5: Publish checklist

- [ ] Click Publish, choose Public, and copy your lovable.app link
- [ ] Open the link on your own phone and on a friend's phone
- [ ] Check the Social and Search previews for title, description and image
- [ ] After any later edit, open Publish and click "Publish changes"

Plan facts as listed on Lovable's site (November 2026)

Item	Free	Pro
Price	Free	From US$25 a month, or US$250 a year (100 credits a month)
Build credits	5 a day, up to 30 a month	Monthly credits plus 5 daily credits
Public publishing on lovable.app	Yes	Yes
Custom domain	No	Yes
Remove "Edit with Lovable" badge	No	Yes

Students and teachers on the Free plan who verify a school email: 50% off Pro (billed monthly) for up to 12 months (lovable.dev/students). Prices and offers change, so check lovable.dev/pricing before you pay.

Step 6: Connect your own domain (paid plan)

- [ ] Option A: Project Settings, Domains, Buy new domain (prices in US dollars; renewal price may differ and is shown at checkout)
- [ ] Option B: Project Settings, Domains, Connect domain, for a domain you already own
- [ ] Remove any old AAAA records for the domain at your registrar
- [ ] Choose automatic setup, or add the records below by hand
- [ ] Wait for verification to finish and the free SSL certificate (padlock in the browser)

Record type	Host / name	Value
A	`@` (root domain)	`185.158.133.1`
TXT	`_lovable`	The `lovable_verify=...` value shown in your setup screen

Most DNS changes work within a few hours, but they can take up to 72 hours.

Step 7: Help Google find your site

- [ ] Add your domain in Google Search Console (Domain property, verified with a DNS record)
- [ ] Use URL Inspection on your home page and request indexing once
- [ ] Do not request again and again; it does not speed things up
- [ ] Expect crawling to take a few days to a few weeks
- [ ] Add your website link to your Google Business Profile and social bios

Monthly upkeep (10 minutes)

Task	Done on
Update offers, timings and festival notices	
Test call, WhatsApp and form buttons	
Check Search Console for errors	
Check domain and plan renewal dates
